

Important Information About Your

# New Recycling Cart

Waste Management is proud to once again work with the City of Punta Gorda to provide the most comprehensive recycling services. With this program, we are rolling out new recycling carts that offer more privacy and litter control, while allowing you to safely recycle more.

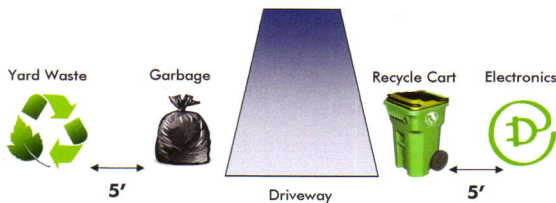

The City of Punta Gorda will continue to provide residents with waste, yard waste, and white goods collection services.

**Waste Management will start servicing carts on your next collection date after October 1st**

- Do not bag your recyclables.
- Place carts curbside with the opening towards the street, leaving 5 feet of clearance from your mailbox and other curbside services.
- If you know that your neighbor is away when the cart is delivered, please roll their cart up to a safe location.

**Think Green with your old recycling bins!**

- The current recycling provider will be collecting their blue recycling bins.
- If you have additional recycle bins at your house, Think Green and reuse them to store garden supplies, fishing or boating equipment, or construction materials.
- Once the recycling cart program begins, your current 18-gallon bin will no longer be serviced.

Place recyclables curbside by 6 a.m. on your scheduled pickup day. Leave 5' of clearance around your recycling cart and other curbside services.

**Let's see the benefits!**

- Recycling carts with lids offer more privacy and better litter control.
- You can recycle more single-stream materials, which will reduce waste in our landfill and protect our natural resources.
- It is easier and safer for you to roll your cart down your driveway rather than carrying a heavy bin full of bottles and cans.
